Form1

```
1302
```

1	2	3
4	5	6
7	8	9
	0	

+

=

Form1

```
2130
```

1	2	3
4	5	6
7	8	9
	0	

+

=

```
1 reference
private void button1_Click(object sender, EventArgs e)
{
    if(output_Box.Text == "0" && output_Box != null)
    {
        output_Box.Text = "1";
    }
    else
    {
        output_Box.Text = output_Box.Text + "1";
    }
}
```

Coding membuat inputan pada button

```csharp
1 reference
private void buttonHasil_Click(object sender, EventArgs e)
{
    double Secondnumber;
    double Result;

    Secondnumber =Convert.ToDouble (output_Box.Text);

    if(Operation == "+")
    {
        Result = (FirstNumber + Secondnumber);
        output_Box.Text = Result.ToString();
        FirstNumber = Result;
    }
```

Coding membuat button hasil

Double second number merupakan deklarasi variable

Result.tostring merubah isi outputbox menjadi string
